STRUCTURE

DESIGN GUIDE

**Vision Imagined.
Anchored in Reality.**

~~Not just a vendor.~~

A partner in the process.

We make custom structures simple. Design forward, engineered to order, and built to elevate your vision without delays.

OUR PROCESS

FROM CONCEPT TO COMPLETION, WE MAKE
EVERY DETAIL SEAMLESS.

1. Concept

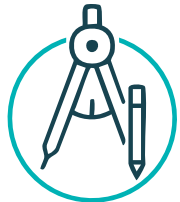

Every vision starts with an idea. We help it take shape.

Whether it's a sketch on paper or a vision in progress, we join in early. Our team listens, explores options, and helps shape ideas into practical, buildable concepts. Early collaboration saves time, reduces costs, and keeps your project moving forward.

2. Design

From first sketches to final plans, we keep it simple.

We start with preliminary designs and budget pricing to create a clear framework for your project. From there, our team refines details, materials, and drawings to align with your goals, saving time and effort.

3. Engineering

We handle the details so you don't have to.

Engineering should feel like collaboration, not complication. Our licensed team transforms design intent into stamped, code-compliant drawings while solving challenges with clarity and precision. Clear communication and practical solutions keep your project on schedule and aligned with your vision.

4. Fabrication

Built right the first time.

Our fabrication process is built for precision and reliability. With AISC & AITC certified facilities, AWS certified welders, robotic steel cutting, automated sandblasting, and a five-stage powder coat system, we deliver consistent quality. Prefabrication reduces on-site headaches and ensures your structure is ready to perform.

5. Delivery & Support

We don't just ship it. We see it through.

From shop to site, we coordinate every detail so your structure arrives safely and on schedule. Our prefabricated systems simplify installation, while our team remains available for questions and support. The result is a smoother project with fewer surprises, letting you focus on the big picture.

6. Partnership

Built on collaboration, grounded in precision.

Every project is a collaboration, and we're here as your partner. From concept to completion, our role is to align details, streamline communication, and ensure your vision is built with precision. With Anchor Design Works, you gain a partner who values design integrity, performance, and craftsmanship—so you can focus on what you do best.

APPLICATIONS

STRONG, STYLISH, AND BUILT TO ENDURE. AN IDEAL FIT FOR YOUR CAMPUS OR ARCHITECTURAL SPACE.

Walkways

Clean lines that guide and connect.

Covered walkways protect against sun and weather while creating clear connections between spaces. Durable, attractive, and functional, they enhance circulation across campuses, healthcare facilities, and community destinations.

Entrances

A statement of welcome and design.

Entrance canopies and arches provide more than cover — they create a sense of arrival. Designed to welcome visitors, they define first impressions for schools, campuses, and public spaces.

Destinations

Balanced design. Built for gathering.

From splashpad covers to beer gardens, swings, and rooftop pavilions, our structures transform everyday spaces into memorable destinations where people gather, play, and connect in lasting ways.

Performance

Designed for acoustics and awe.

Band shells, amphitheaters, and outdoor stages provide shaded venues for concerts, festivals, and community events. Designed for beauty and acoustics, they invite people in and elevate performances.

Rooftop & Urban Spaces

Adaptive design. Elevated experience.

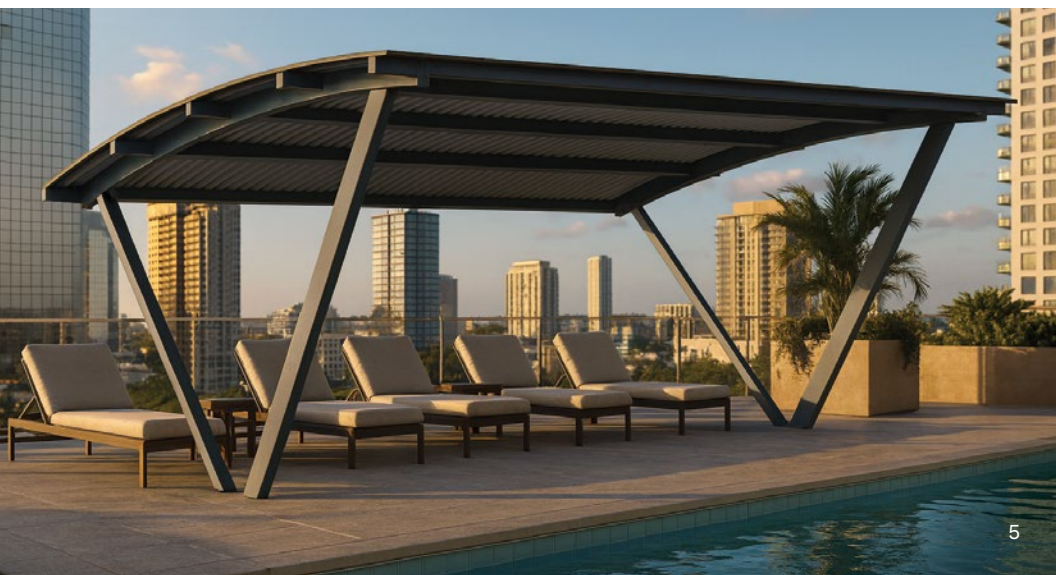

Activate rooftops and urban spaces with cabanas, pergolas, and shade structures. Our designs create modern amenities that encourage gathering, relaxation, and revitalization in dense environments.

Open Air Markets

Form meets function in every detail.

Markets thrive in spaces designed for people. Canopies, pavilions, and shade covers create lively, functional marketplaces that protect vendors and visitors while elevating the community experience.

INDUSTRIES WE SERVE

STRUCTURES BUILT FOR DESIGN-DRIVEN SPACES, WHERE
FORM, FUNCTION, AND PERFORMANCE ALIGN.

Healthcare & Senior Living

Healing spaces extend outdoors. Shaded walkways, courtyards, and gathering covers provide comfort and connection for patients, residents, and families, enhancing wellness through thoughtful design and low-maintenance, durable structures.

Hospitality & Entertainment

Elevate the guest experience with outdoor dining covers, beer gardens, performance spaces, and cabanas. Our structures create memorable destinations for resorts, restaurants, and entertainment venues that invite people to stay, gather, and return.

Education & Campus Life

Universities and schools benefit from walkway covers, entrance canopies, and outdoor classrooms. Structures create safe, inspiring environments for study, play, and connection across campuses that blend tradition with modern design.

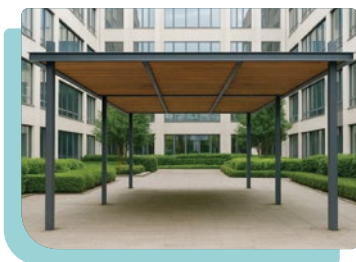

Transportation & Public Works

From transit shelters and pedestrian bridges to carports, storage covers, and generator enclosures, our solutions support essential infrastructure. Durable and efficient, they make public spaces functional, safe, and enduring.

Housing & Urban Development

Renew community spaces with rooftop amenities, open-air markets, entry canopies, and mail kiosks. Our structures activate urban environments, blending function and style to enhance livability and encourage neighborhood connection.

Corporate & Institutional Campuses

Shade, shelter, and signature design elevate employee and visitor experiences. Walkways, entry arches, solar carports, and functional art help organizations create campuses that inspire productivity, pride, and a sense of place.
